Non-U.S. Equity <sup>4</sup>	11.5
Fixed Income <sup>5</sup>	32.2
Net Cash & Other <sup>6</sup>	-0.2

### Risk Metrics (5 Year)

Beta <sup>7</sup>	1.17
Standard Deviation <sup>8</sup>	13.83

### Investment Committee

Managed by the Balanced Fund Investment Committee, whose members' average tenure at Dodge & Cox is 16 years.

### Investment Objective

Dodge & Cox Balanced Fund seeks regular income, conservation of principal, and an opportunity for long-term growth of principal and income.

### Investment Approach

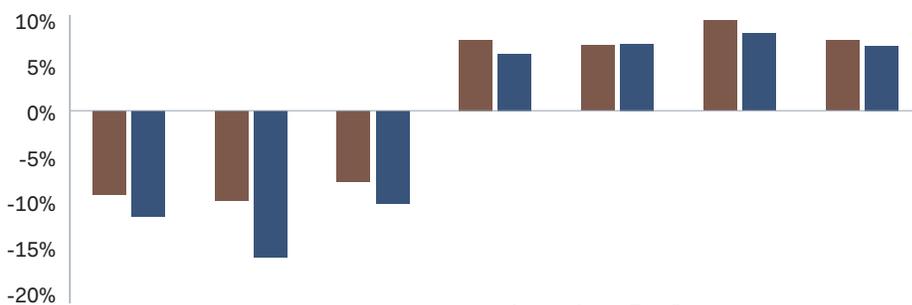

The Fund offers investors a highly selective, actively managed mutual fund, diversified across equity and fixed income. Generally, we:

- Invest a portion of the Fund's portfolio in equity investments that, in our opinion, appear to be temporarily undervalued by the stock market but have a favorable outlook for long-term growth.
- Invest a portion of the Fund's portfolio in investment-grade debt securities including government and government-related obligations, mortgage- and asset-backed securities, corporate and municipal bonds, and other debt securities. The Fund may also invest in below investment-grade debt securities.
- Allocate between equity and debt investments based on our assessment of the potential risks and returns for each asset class over a three- to five-year horizon.

### Performance<sup>1</sup>

Total Returns (%)

Benchmark:  
Combined Index  
(60% S&P 500 /  
40% Bloomberg  
U.S. Aggregate  
Bond Index (BBG  
U.S. Agg))

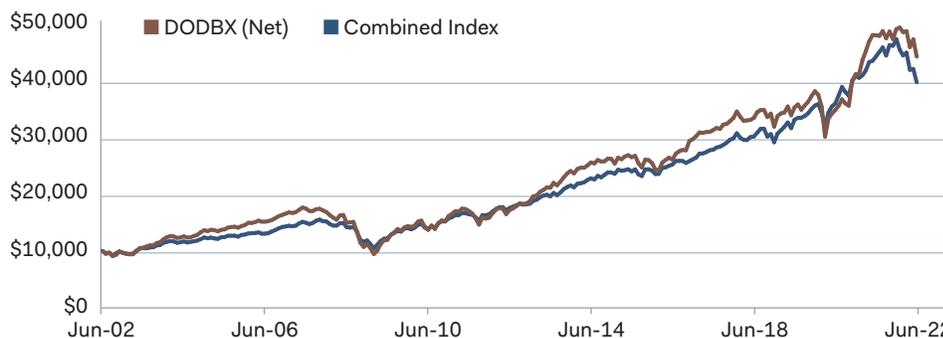

Average Annual Total Returns

	3 Months	YTD	1 Year	3 Years	5 Years	10 Years	20 Years
■ DODBX (Net)	-9.23	-9.88	-7.86	7.80	7.17	9.91	7.72
■ Combined Index	-11.63	-16.11	-10.24	6.23	7.37	8.50	7.14

Returns represent past performance and do not guarantee future results. Investment return and share price will fluctuate with market conditions, and investors may have a gain or loss when shares are sold. Mutual fund performance changes over time and may be significantly lower than stated above. Performance is updated and published monthly. Visit the Fund's website at [dodgeandcox.com](http://dodgeandcox.com) or call 800-621-3979 for current month-end performance figures.

Effective Maturity (years)	12.7	-	8.6

## Risks

The Fund invests in individual stocks, bonds and other securities whose market values fluctuate within a wide range, so that your investment may be worth more or less than its original cost. The Fund's performance could be hurt by equity risk, market risk, manager risk, liquidity risk, geographic risk and derivatives risk. In addition the Fund's fixed income performance could be hurt by interest rate risk, credit risk, below-investment grade securities risk, mortgage- and asset-backed securities risk, to-be-announced transaction risk, and call risk. Please read the [prospectus](#) for specific details regarding the Fund's risk profile.

- All returns are stated in U.S. dollars, unless otherwise noted. The Funds' total returns include the reinvestment of dividend and capital gain distributions, but have not been adjusted for any income taxes payable by shareholders on these distributions or on Fund share redemptions. Index returns include dividend and/or interest income but, unlike Fund returns, do not reflect fees or expenses.
- SEC Yield is an annualization of the Fund's net investment income for the trailing 30-day period. Dividends paid by the Fund may be higher or lower than implied by the SEC Yield.
- Portfolio Turnover is calculated as the lesser of the portfolio purchases or sales divided by the average portfolio value for the period.
- May include direct and synthetic equity investments.
- Includes Preferred securities classified as corporates, including securities representing 1.7% of the Fund that were classified as equity securities until April 19th, 2022.
- Net Cash & Other includes cash, short-term investments, unrealized gain (loss) on derivatives, receivables, and payables.
- Beta is a measure of the volatility—or systematic risk—of a portfolio compared to the benchmark measured over a specified time period.
- Standard Deviation measures the volatility of the Fund's returns. Higher Standard Deviation represents higher volatility.
- The credit quality distributions shown for the Fund and the Index are based on the middle of Moody's, S&P, and Fitch ratings, which is the methodology used by Bloomberg in constructing its indices. If a security is rated by only two agencies, the lower of the two ratings is used. Please note the Fund applies the highest of Moody's, S&P, and Fitch ratings to determine compliance with the quality requirements stated in its prospectus. Calculating below investment grade securities on this basis may result in lower allocation figures. For consistency purposes, we use the S&P and Fitch rating categories. The credit quality of the investments in the portfolio does not apply to the stability or safety of the Fund or its shares.
- The Fund's portfolio holdings are subject to change without notice. The mention of specific securities is not a recommendation to buy, sell, or hold any particular security and is not indicative of Dodge & Cox's current or future trading activity.
- Price-to-Earnings (forward) ratios are calculated using 12-month forward earnings estimates from third-party sources as of the reporting period. Estimates reflect a consensus of sell-side analyst estimates, which may lag as market conditions change.
- The portfolio's Price-to-Earnings ratios exclude extraordinary items and negative earnings. Benchmark figures exclude extraordinary items and negative earnings.
- Portfolio calculation excludes Financials and Utilities.
- This figure sums the product of each holding's company market capitalization (market price multiplied by the number of shares outstanding) and weighting in the portfolio.
- Median market capitalization represents the midpoint of market capitalization for all of the equity securities in the portfolio. Half of the securities will have a higher market capitalization and half will have a lower market capitalization. (Market capitalization is a measure of the security's size. It is the market price of a security multiplied by the number of shares outstanding.)
- Effective Duration is a measure of a portfolio's interest rate sensitivity, including the impact of derivatives used to adjust duration.

Figures represented by a dash are zero or have no associated data while figures represented by a zero may be rounded to zero.

Market values for debt securities include accrued interest.

The Combined Index reflects an unmanaged portfolio (rebalanced monthly) of 60% of the S&P 500 Index, which is a market capitalization-weighted index of 500 large-capitalization stocks commonly used to represent the U.S. equity market, and 40% of the Bloomberg U.S. Aggregate Bond Index (BBG U.S. Agg), which is a widely recognized, unmanaged index of U.S. dollar-denominated, investment-grade, taxable fixed income securities. The Fund may, however, invest up to 75% of its total assets in equity securities.

S&P 500® is a trademark of S&P Global Inc. Bloomberg is a registered trademark of Bloomberg Finance L.P. and its affiliates. For more information about these indices, visit [dodgeandcox.com](#).

Before investing in any Dodge & Cox Fund, you should carefully consider the Fund's investment objectives, risks, and charges and expenses. To obtain a Fund's prospectus and summary prospectus, which contain this and other important information, visit [dodgeandcox.com](#) or call 800-621-3979. Please read the [prospectus](#) and [summary prospectus](#) carefully before investing.
