## Footnotes & Disclosures

1. Average of the Dodge & Cox Stock Fund, International Stock Fund, Global Stock Fund, and Emerging Markets Stock Fund 2022 annual portfolio turnovers. Portfolio turnover is calculated as the lesser of the portfolio purchases or sales divided by the average portfolio value for the period.
2. Average of the Dodge & Cox Stock Fund, International Stock Fund, Global Stock Fund, and Emerging Markets Stock Fund active share versus their primary benchmarks. Active share is a measure of how much an investment portfolio differs from its primary benchmark index, based on a scale of 0% (complete overlap with the index) to 100% (no overlap). Overlap for each security in the Fund is the lower of either its percentage weight in the Fund or its percentage weight in the relevant index. Active share is calculated as 100% minus the sum of the overlapping security weights.
